Disclaimer

Disclaimer:

Individual results may vary. Modding blasters is a hobby of ours, and in no way do we claim to be experts on the subject. We've written this manual for other enthusiasts who want to accomplish what we have with our blasters. However, due to legal reasons, we're unable to guarantee any results and the content in this manual should not be considered professional advice.

The use of this information and recommended products should be based on your own due diligence. You agree not to hold the authors and/or distributors of this manual liable for any success or failure of your endeavors that are directly or indirectly related to the purchase and use of our information, recommended products and services.

Make sure you have good knowledge on electric circuit and modding skill. Please read below instruction carefully and reference to online video on installing instruction.

INSTALLATION STEPS

Supplies Needed:

- Small Phillips Head Screwdriver
- Small Flat Head Screwdriver

Step 1:

Remove all the screw on the blaster as shown and keep in safe area.

Step 2:

Pick up the cover half and keep the parts as shown in red circle.

Step 3:

Carefully remove the modules, keep the parts as shown for later mod.

Step 4:

Replace the original muzzle with the barrel supplied in the kit, fasten the screws and secure in position.

Step 5:

Remove the hammer in the mechanic module, keep the metal rod in safe area.

Step 6:

Install the hammer supplied in the kit, plug the metal rod back into the plunger module carefully.

**Step 7:**

Replace the rubber cushion pads on the side of each halves by the cushion pad supplied in the kit.

Step 8:

Upgrade the plunger module with protective ring pad, remove the rod and coil, install the ring pad into the plunger as shown position and direction.

**Step 9:**

After installing the ring pad into the plunger, push the ring pad toward top of the plunger tube.

Step10:

★ Apply thin layer of lubricant evenly on inside wall of plunger tube, in order to ensure air tight in the plunger.

MAJOR MEASURE

Step 11:

★ Replace the O Ring with supplied in the kit, apply a thin layer of lubricant to ensure air tight and smooth movement.

Step 12:

★ Install the rod into the plunger tube, be careful straight angle while pushing the rod to avoid damaging plunger tube.

Step 13:

Upgrade the Trigger lock module, replace with spring coil supplied in the kit, position as shown.

Step 14:

Install all the modules back to the blaster, check carefully the position and snap fitting.

**Step 15:**

Before closing the blaster halves, check the magazine lock if in position.

Install all the screws back to the blaster and go for new shooting experience!

installation is complete .
