## **Disclaimer:**

Individual results may vary. Modding blasters is a hobby of ours, and in no way do we claim to be experts on the subject. We've written this manual for other enthusiasts who want to accomplish what we have with our blasters. However, due to legal reasons, we're unable to guarantee any results and the content in this manual should not be considered professional advice.

The use of this information and recommended products should be based on your own due diligence. You agree not to hold the authors and/or distributors of this manual liable for any success or failure of your endeavors that are directly or indirectly related to the purchase and use of our information, recommended products and services.

Make sure you have good knowledge on electric circuit and modding skill. Please read below instruction carefully and reference to online video on installing instruction.

## ***INSTALLATION STEPS***

---

### **Supplies Needed:**

- Small Phillips Head Screwdriver
- Small Flat Head Screwdriver

### **Step 1:**

Remove all the screw on the blaster and beware keeping the screws in safe area.

**Step 2:**

Remove the muzzle and top front bridge parts, keep it safe for reverse modding.

**Step 3:**

Replace the muzzle with Worker MOD F10555 Stryfe muzzle.

**Step 4:**

Cover the blaster shell back and fasten all the screws.

**Step 5:**

Install the barrel jacket into the muzzle, slide to the end and ensure no gap in between.

**Step 6:**

Install the screws under the barrel jacket, fasten to secure the parts to the muzzle.

**Step 7:**

Install the handle according to the order, slide the rear parts on the top rail, next come with the front parts and finish by fasten the screw to secure the handle in position.

**Step 8:**

Install the handle rail according to the order, fasten the screw to secure the top rails, install the rear and front sight slide into the top rail and secure in position.

**Step 9:**

Install the tactical rails onto the barrel jacket as shown indicate with rails length.
