Disclaimer

Disclaimer:

Individual results may vary. Modding blasters is a hobby of ours, and in no way do we claim to be experts on the subject. We've written this manual for other enthusiasts who want to accomplish what we have with our blasters. However, due to legal reasons, we're unable to guarantee any results and the content in this manual should not be considered professional advice.

The use of this information and recommended products should be based on your own due diligence. You agree not to hold the authors and/or distributors of this manual liable for any success or failure of your endeavors that are directly or indirectly related to the purchase and use of our information, recommended products and services.

Make sure you have good knowledge on electric circuit and modding skill. Please read below instruction carefully and reference to online video on installing instruction.

INSTALLATION STEPS

Supplies Needed:

- Small Phillips Head Screwdriver
- Small Flat Head Screwdriver

Step 1:

Remove all the screw on the blaster and beware keeping the screws in safe area.

Step 2:

Remove the muzzle and top front bridge parts, keep it safe for reverse modding.

Step 3:

Replace the muzzle with Worker MOD F10555 Stryfe muzzle.

Step 4:

Cover the blaster shell back and fasten all the screws.

Step 5:

Insert and push the barrel jacket parts into the muzzle.

Step 6:

Secure the barrel jacket by fastening the screw on top, install the 5cm rail under the barrel jacket.

Step 7:

Install the rear sight onto the top rail parts, secure with fastening the screw.

Step 8:

Slide the module toward the end of the blaster rail and a bit more as shown image.

Step 9:

Slide back the rail module to the front, ensure the front fit into as shown image, fasten the screw to secure the rail module.
