Disclaimer

Disclaimer:

Individual results may vary. Modding blasters is a hobby of ours, and in no way do we claim to be experts on the subject. We've written this manual for other enthusiasts who want to accomplish what we have with our blasters. However, due to legal reasons, we're unable to guarantee any results and the content in this manual should not be considered professional advice.

The use of this information and recommended products should be based on your own due diligence. You agree not to hold the authors and/or distributors of this manual liable for any success or failure of your endeavors that are directly or indirectly related to the purchase and use of our information, recommended products and services.

Make sure you have good knowledge on electric circuit and modding skill. Please read below instruction carefully and reference to online video on installing instruction.

INSTALLATION STEPS

Supplies Needed:

- Small Phillips Head Screwdriver
- Small Flat Head Screwdriver

Step 1:

Remove the body handle and front sight as located in red box by a hand saw.

Step 2:

Finish sawing and grind the cutting edge by a file if necessary.

Step 3:

Assembly the rails with given screws, make it become a single parts.

Step 4:

Install the rail by insert the front fitting into the top of barrel jacket, location as shown in image red circle.

Step 5:

Stick the rail onto the blaster with the adhesive tape, slightly moving the rail in straight position before pressing and sticking the rail.

installation is complete 。
