Disclaimer

Disclaimer:

Individual results may vary. Modding blasters is a hobby of ours, and in no way do we claim to be experts on the subject. We've written this manual for other enthusiasts who want to accomplish what we have with our blasters. However, due to legal reasons, we're unable to guarantee any results and the content in this manual should not be considered professional advice.

The use of this information and recommended products should be based on your own due diligence. You agree not to hold the authors and/or distributors of this manual liable for any success or failure of your endeavors that are directly or indirectly related to the purchase and use of our information, recommended products and services.

Make sure you have good knowledge on electric circuit and modding skill. Please read below instruction carefully and reference to online video on installing instruction.

INSTALLATION STEPS

Supplies Needed:

- Small Phillips Head Screwdriver
- Small Flat Head Screwdriver

Step 1:

Remove all the screws on the blaster body and keep all well, remove the stock muzzle and sling parts.

Step 2:

Install the barrel adaptor into the blaster body, locate the blaster muzzle and fit the adaptor into position.

Step 3:

Cover the blaster and secure with all the stock screw back to the body.

Step 4:

Install the barrel into the barrel adaptor, slide from the front along the adaptor end.

Step 5:

Secure the barrel onto the blaster, fasten the screws on the top and bottom of the barrel.
